RECORD MORE—WITH THE iRECORD MULTIVERSE SERVER

SERVER-GRADE CAPTURE SYSTEM

Designed specifically for the public safety sector, **iRecord** Multiverse is the **scalable and cost-effective solution** to record more interviews and analyze critical evidence faster. The server platform also gives agencies **multiple backup options** to keep all of their interview recordings and additional digital evidence secure with reliable and compliant technology.

- Compact 1U Rack Server
- Intel Xeon Silver 16 Core Processor
- 16GB Error Correction Code RAM
- RAID 1 Data Storage

- Dual M.2 Drives for OS and Video Processing
- 8TB Storage Capacity
- Redundant 800W Power Supply
- Dual NIC Built In

SCALABLE TO 9 ROOMS AND 18 CAMERAS

Located in a server room for a more reliable environment, **iRecord** Multiverse has a small hardware footprint **that fits right inside your server rack.** Agencies no longer need a designated workspace to review interview evidence, and they gain support for **up to 18 high-definition interview room cameras**—all recording with a single solution!

THE POWER OF iRECORD MULTIVERSE

As a centralized database, **the virtual server capacities** of **iRecord** Multiverse are perfect for large facilities and public safety agencies spread across multiple site locations.

MINIMIZE RISK
advanced options for recording backups

Interview evidence recorded with Multiverse is automatically exported to network storage. Users even have the ability to **sync their system** with a cloud storage solution and/or create an SD Card Edge Backup during recording **as another form of redundancy.**

PROTECT THE BUDGET
no need for multiple storage systems

iRecord Multiverse allows for **unlimited simultaneous users** and delivers enterprise-level hosting. Facilities throughout your jurisdiction can utilize **the same Multiverse platform** via agency VLAN connections.

INCREASE EFFICIENCY
what used to take hours—now down to seconds

Agencies operating with Multiverse **are able to integrate** with the full range of **iRecord's** partner products. **Streamline your workflow** and start analyzing your digital evidence with machine learning, data mining, artificial intelligence, facial recognition, and more.

ALL-IN-ONE, TURNKEY TECHNOLOGY

iRecord is the premier end-to-end solutions provider for **audio video recording and digital content management** across the United States, Canada, and beyond.
